## **Company Profile.**

**Legnoquattro** is one of just a handful of **industrial manufacturers of dyed veneers** in the world. The veneers are manufactured via a four-stage industrial process, composed of bleaching, dying, drying and pressing.

The sheets are immersed in the dye so that it fully penetrates the veneer, resulting in a uniform tone and an enhanced natural grain. Our dyed veneers are widely used in **furniture** and **interior design** projects, as well as in the **automotive** and **marine** industries. At Legnoquattro we make veneers under our own brand as well as for third parties.

Legnoquattro's HQ is located in Novedrate, between Milan and Como, **in the heart of Italy's most influential furniture and design district**. Founded in 1983, and with over forty years' experience in the field, the company now boasts a prestigious global client base, who expect nothing but the highest levels of quality and customization.

Legnoquattro has an **established network** of raw material suppliers, providing a vast range of wood varieties. Our in-house buying team work hard to ensure we purchase only the best raw materials for our veneers. Additionally, our **lab technicians** work tirelessly to create new color tones, new product lines and bespoke samples for our clients. Our plants at Novedrate and Giussano use two different manufacturing techniques (vats and cylinder machines) to ensure we meet the diverse requirements of our clients.

At Legnoquattro we have a tailored client service approach, that's in keeping with our reputation as one of the most experienced and specialized suppliers on the market. We can assist you every step of the way, from **selecting the best raw materials and the perfect wood / color combination**, to installation of the finished veneer.

## Why LEGNOQUATTRO

### 1.UNPARALLELED EXPERTISE

At Legnoquattro we manufacture dyed veneers and nothing else.

This level of specialisation, underpinned by forty years' experience in the field, means we have developed a level of expertise that's second to none. This is clearly reflected in the high level of specialised training received by our employees.

### 2.QUALITY YOU CAN RELY ON

Legnoquattro was founded in the heart of Italy's most influential furniture and design district, where the business has continued to develop and grow, with our veneers featuring in some of the world's most prestigious design projects.

Catering to a highly demanding and creative client base is what we do best. We therefore offer a skillset manufacturing process and level of reliability that is second to none.

### 3.THE PERSONAL TOUCH

Legnoquattro clients have access to a vast range of products, with an unparalleled choice of pre-crafted colours as well as a bespoke colour creation service.

Our clients can view and select the veneers prior to dying, so as to be sure the finished product will meet their specific needs.

### 4.SUPERIOR SUPPORT

As our veneers are manufactured in-house, we are able to provide full technical support to our clients every step of the way, from design, to manufacture, to installation of the finished veneer. We will help you select the most appropriate raw material and the perfect colour before providing any technical assistance you may require during the installation phase.

To ensure the finished product meets the client brief, Legnoquattro offers colour testing, sampling and mock-up services.

### 5. A RELATIONSHIP BUILT ON TRUST

At Legnoquattro we strive to develop and maintain long-lasting relationships with our business partners, whether they are direct clients, distributors or agents.

### 6. Sustainability and the environment

Legnoquattro uses FSC® (**Forest Stewardship Council**®) wood from forests that are sustainably managed and subject to environmental and community protection standards. Our wood dyes are **non-toxic** and biodegradable. Our factory waste water purification plant operates on an organic activated sludge process, which conforms to the **highest environmental standards**.
